# CONVERGE

NHERI 

**ISEEER**  
INTERDISCIPLINARY  
SCIENCE & ENGINEERING  
EXTREME EVENTS  
RESEARCH

**SSEER**  
SOCIAL SCIENCE  
EXTREME EVENTS  
RESEARCH

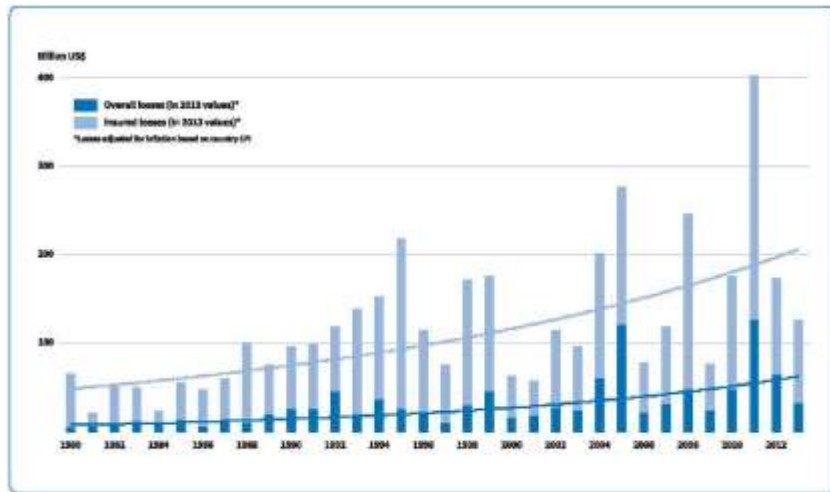

**CONVERGE** – headquartered at the Natural Hazards Center – is a new **National Science Foundation-Natural Hazards Engineering Research Infrastructure (NSF-NHERI)** facility dedicated to:

- ✓ ***linking*** social science, engineering, and interdisciplinary research communities through networks and research platforms;
- ✓ ***developing*** and ***sharing*** best practices for the ethical conduct of research;
- ✓ ***enhancing and promoting*** social science, engineering, and interdisciplinary natural hazards research to reduce vulnerability.

# What is Convergence?

- Convergence research is often driven by a specific and compelling **problem**.
- It *requires the integration of knowledge, theories, methods, and expertise from different disciplines* to achieve **scientific breakthroughs** that otherwise would not be possible.

**Problem** —————→ **Breakthrough**

See: National Research Council, <https://www.nap.edu/catalog/18722/convergence-facilitating-transdisciplinary-integration-of-life-sciences-physical-sciences-engineering>

National Science Foundation, <https://www.nsf.gov/od/oia/convergence/index.jsp>

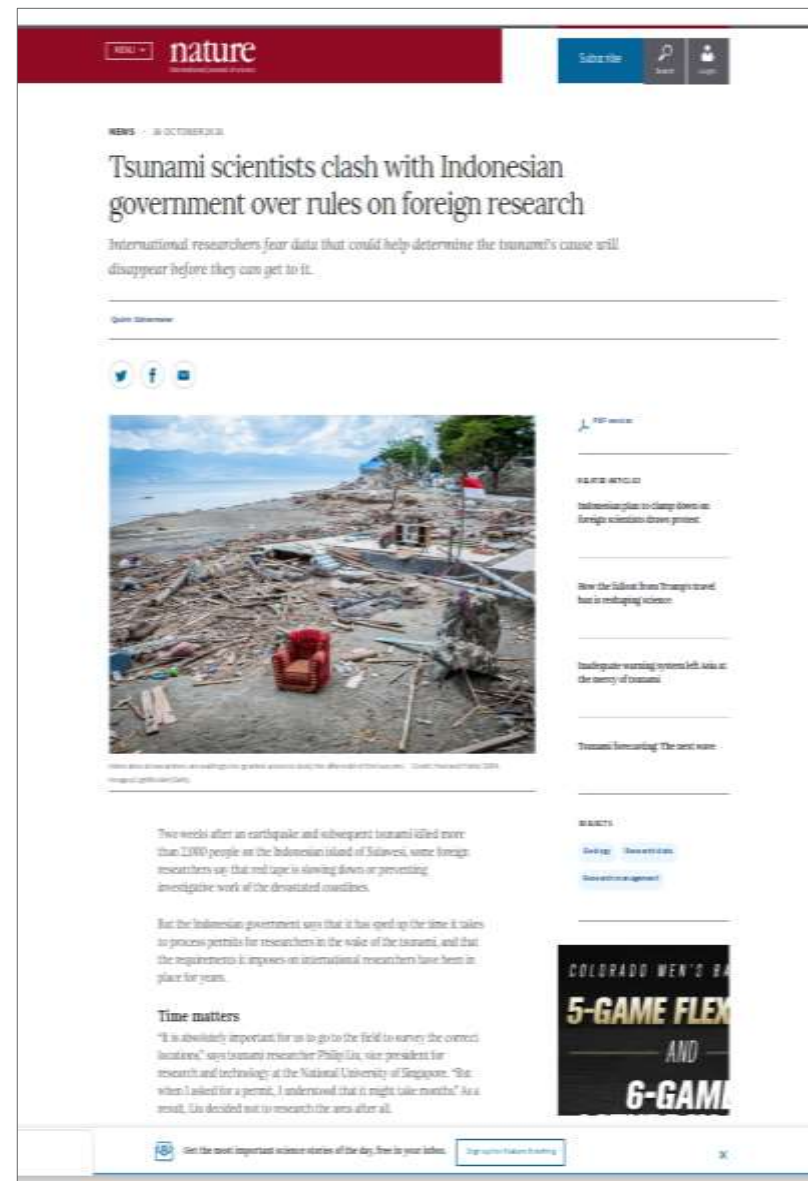

**CONVERGE** represents *a coming together*—for the first time—of NSF-**E**xtrême **E**vents **R**econnnaissance (EER) networks and **N**HERI facilities designed to support those efforts.

# Why CONVERGE?

# Post-Disaster Research

## Contributions

## Challenges

# Post-Disaster Research

## Contributions

## Challenges

# Post-Disaster Research

## Contributions

## Challenges

- ☐ Who sets the post-disaster research agenda?
- ☐ Who benefits from the knowledge produced?
- ☐ Methodological and ethical critiques:
  - ☐ Overemphasis on acute onset, large-scale events.
  - ☐ Lack of identification and coordination of researchers.
  - ☐ Exclusion of local researchers.
  - ☐ Focus on perishable data collection leaves little time to understand local cultures, norms, and policies.
  - ☐ Problems with duplication, and not enough scientific replication.

# □ How many social science hazards and disaster researchers are there?

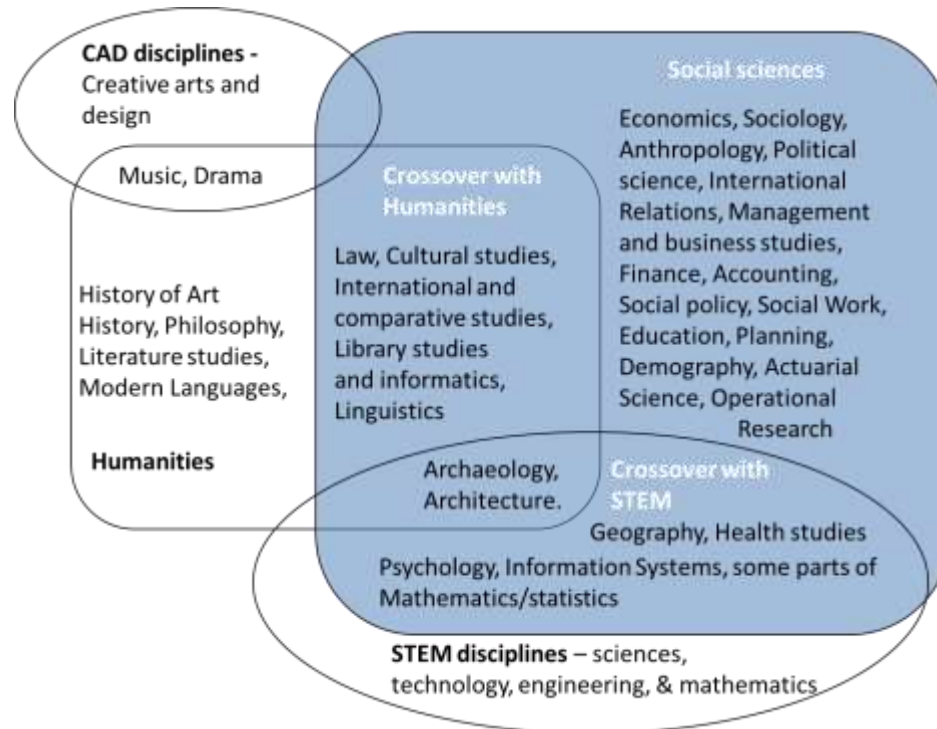

“The **size and composition of the hazards and disaster workforce** will significantly determine the extent to which the social sciences, in general, can respond forcefully to **twenty-first century demands** for basic social science knowledge and its application... The committee ***does not have a precise accounting*** of the numbers of social scientists from respective disciplines currently engaged in hazards and disaster research. Neither government agencies nor professional associations systematically collect data on this research workforce...” (NRC, 2006, pp. 317, 320, *emphasis added*).

- ☐ How many social science hazards and disaster researchers are there?
- ☐ **Where** are these researchers located?

- How many social science hazards and disaster researchers are there?
- Where are these researchers located?
- **What disciplines** do they represent and what is their **topical and methodological expertise**?

- ❑ How many social science hazards and disaster researchers are there?
- ❑ Where are these researchers located?
- ❑ What disciplines do they represent and what is their topical and methodological expertise?
- ❑ What **phases of the disaster lifecycle** and what **disasters** have they studied?

- ☐ How many social science hazards and disaster researchers are there?
- ☐ Where are these researchers located?
- ☐ What disciplines do they represent and what is their topical and methodological expertise?
- ☐ What disasters have they studied?
- ☐ What is the **demographic composition** of the research workforce?

**SSEER** is a NSF-supported network and online platform for **social science** hazards and disaster researchers.

The mission is to:

- 1) ***identify*** and ***connect*** social science researchers to one another, to interdisciplinary teams, and to communities at risk to and affected by hazards and disasters
- 2) ***amplify*** and ***advance*** social science hazards and disaster research

The form to **join SSEER** has been live since July 2018:

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

[hazards.colorado.edu/news/director/a-call-to-social-scientists](https://hazards.colorado.edu/news/director/a-call-to-social-scientists)

✓ **How many** social science hazards and disaster researchers are there?\*

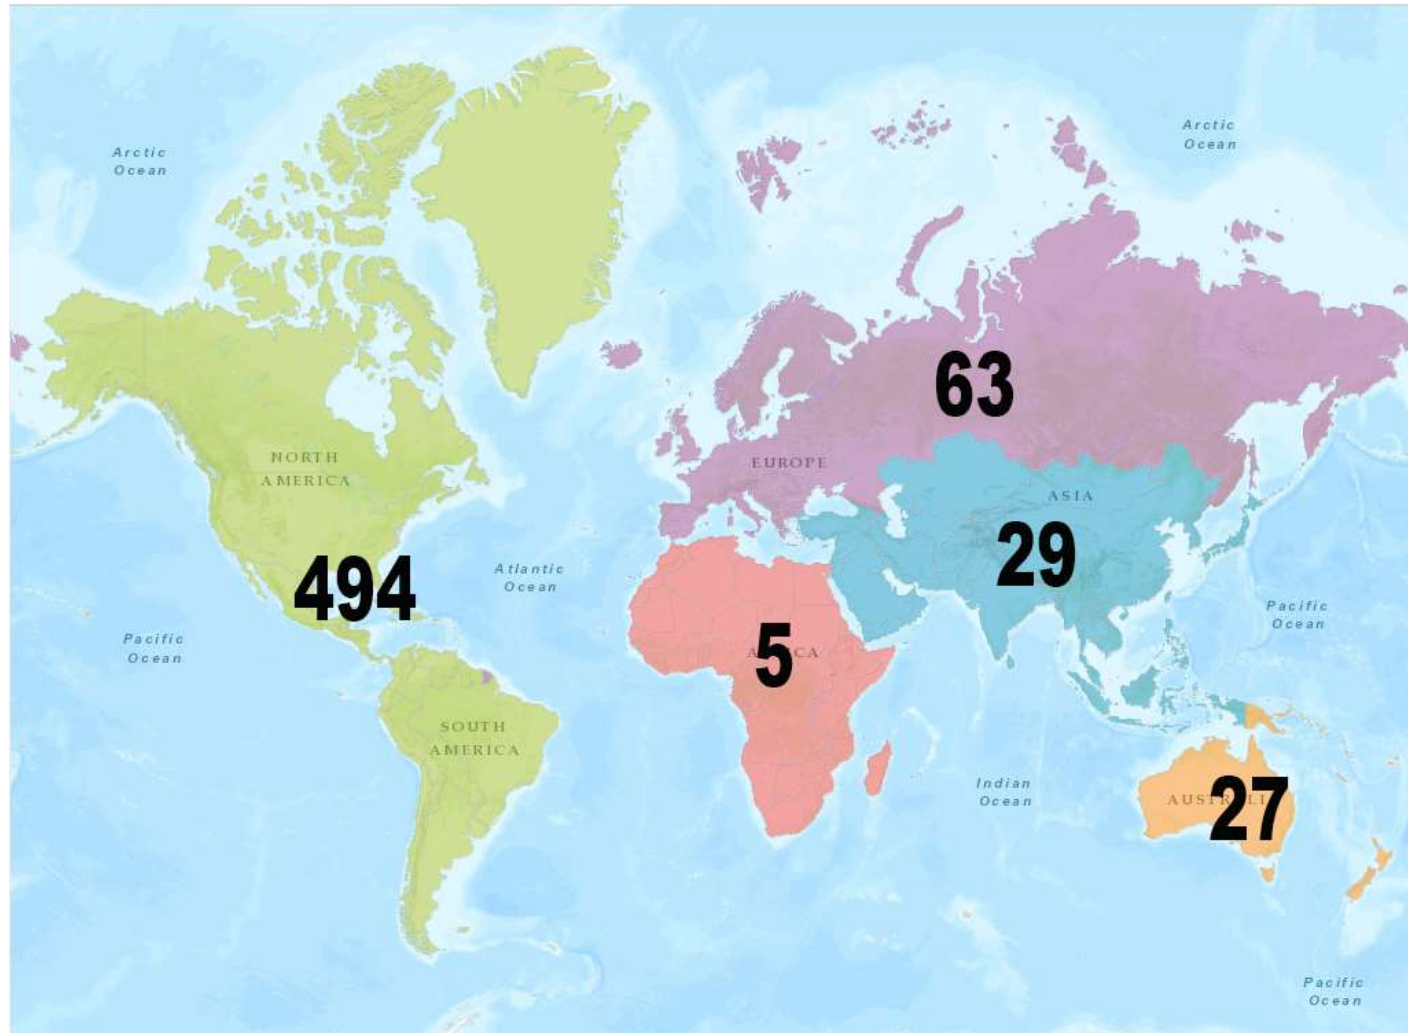

**\*as of October 30, 2018;  
this is not a complete  
census**

- ✓ How many social science hazards and disaster researchers are there?
- ✓ **Where** are these researchers located?

# The SSEER Census: 618 respondents, by UN Region [as of October 30, 2018]

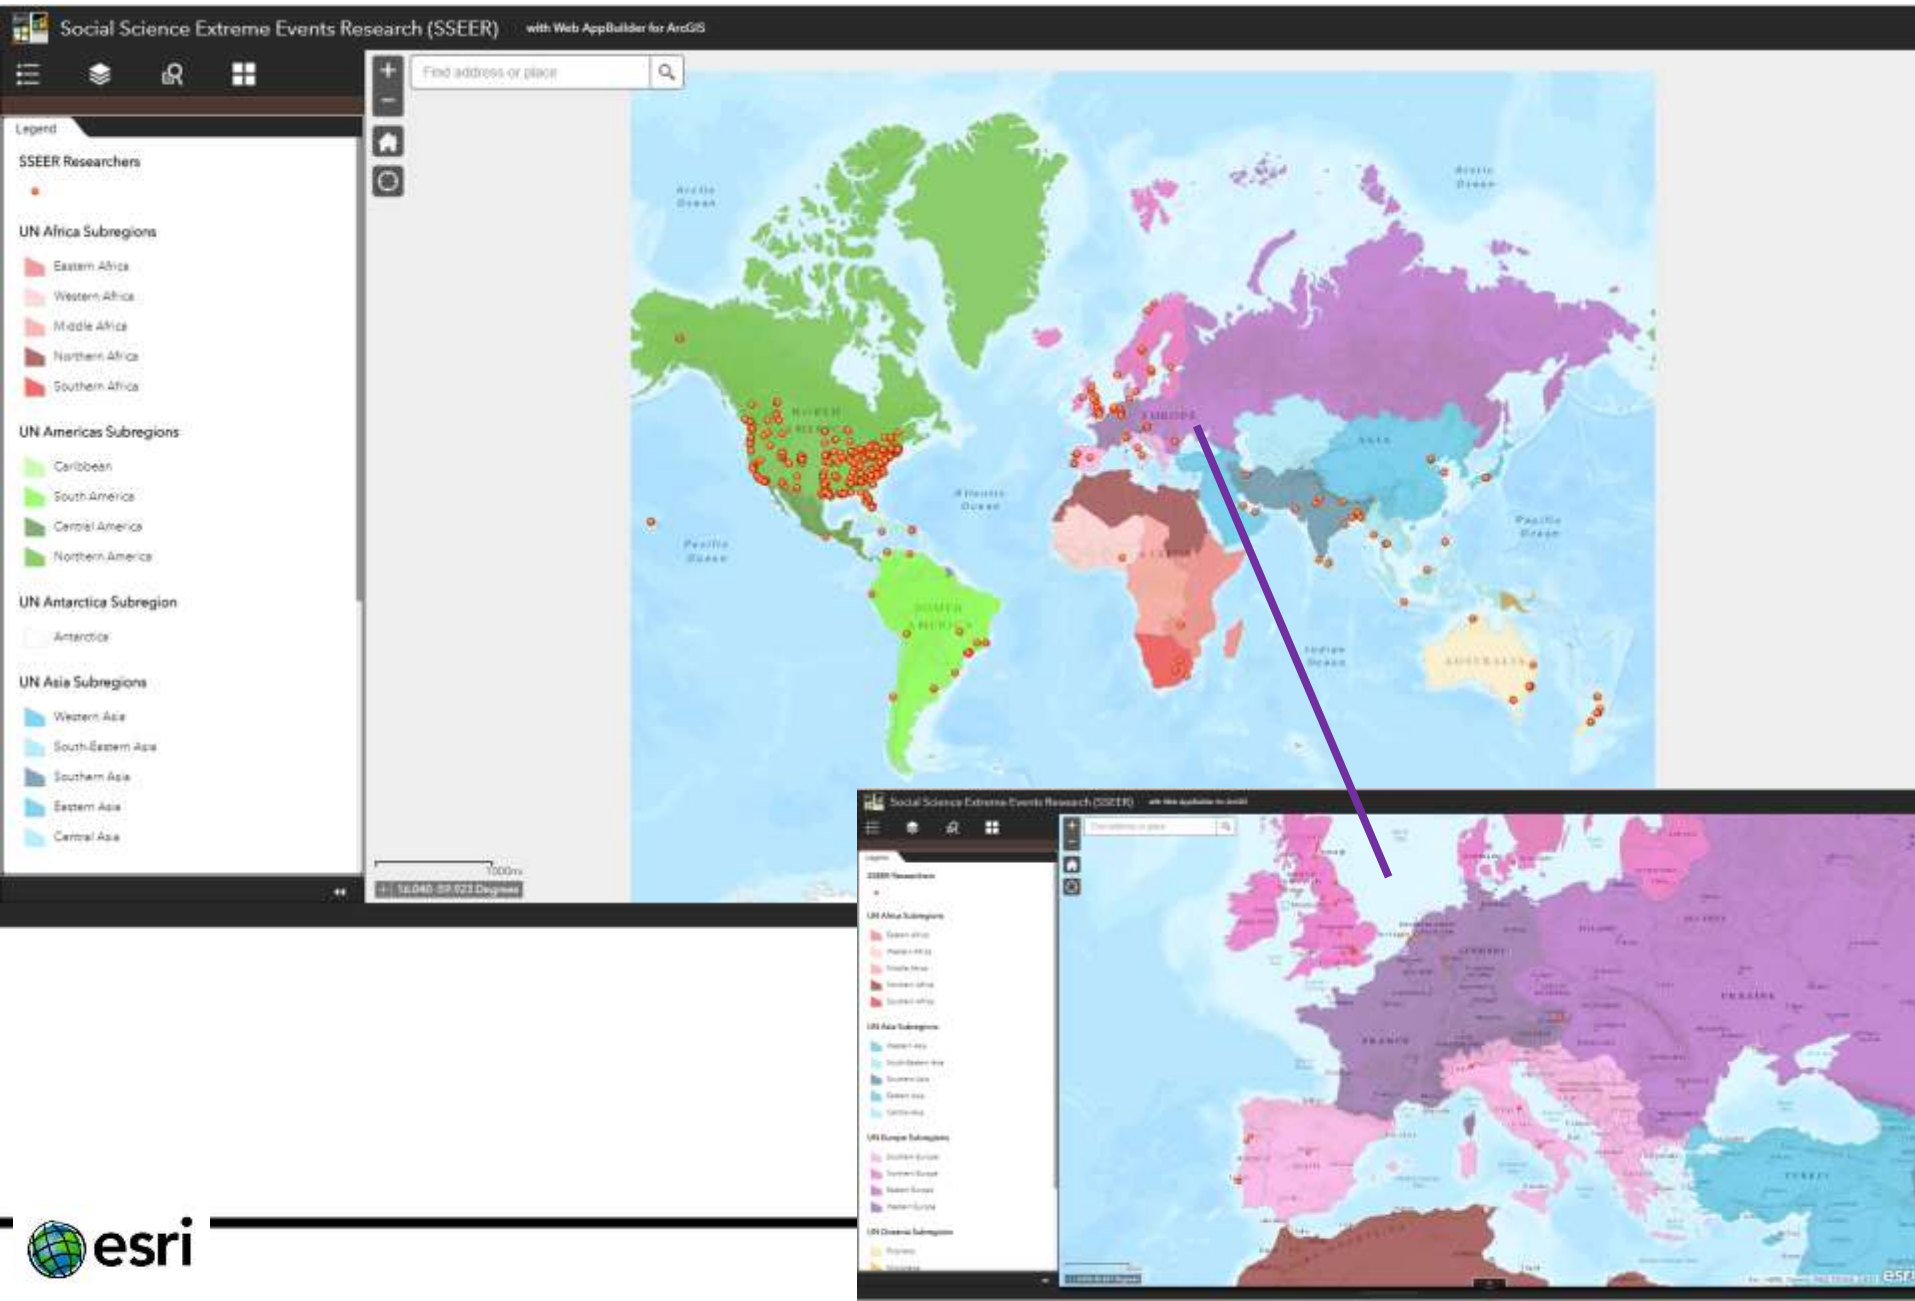

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

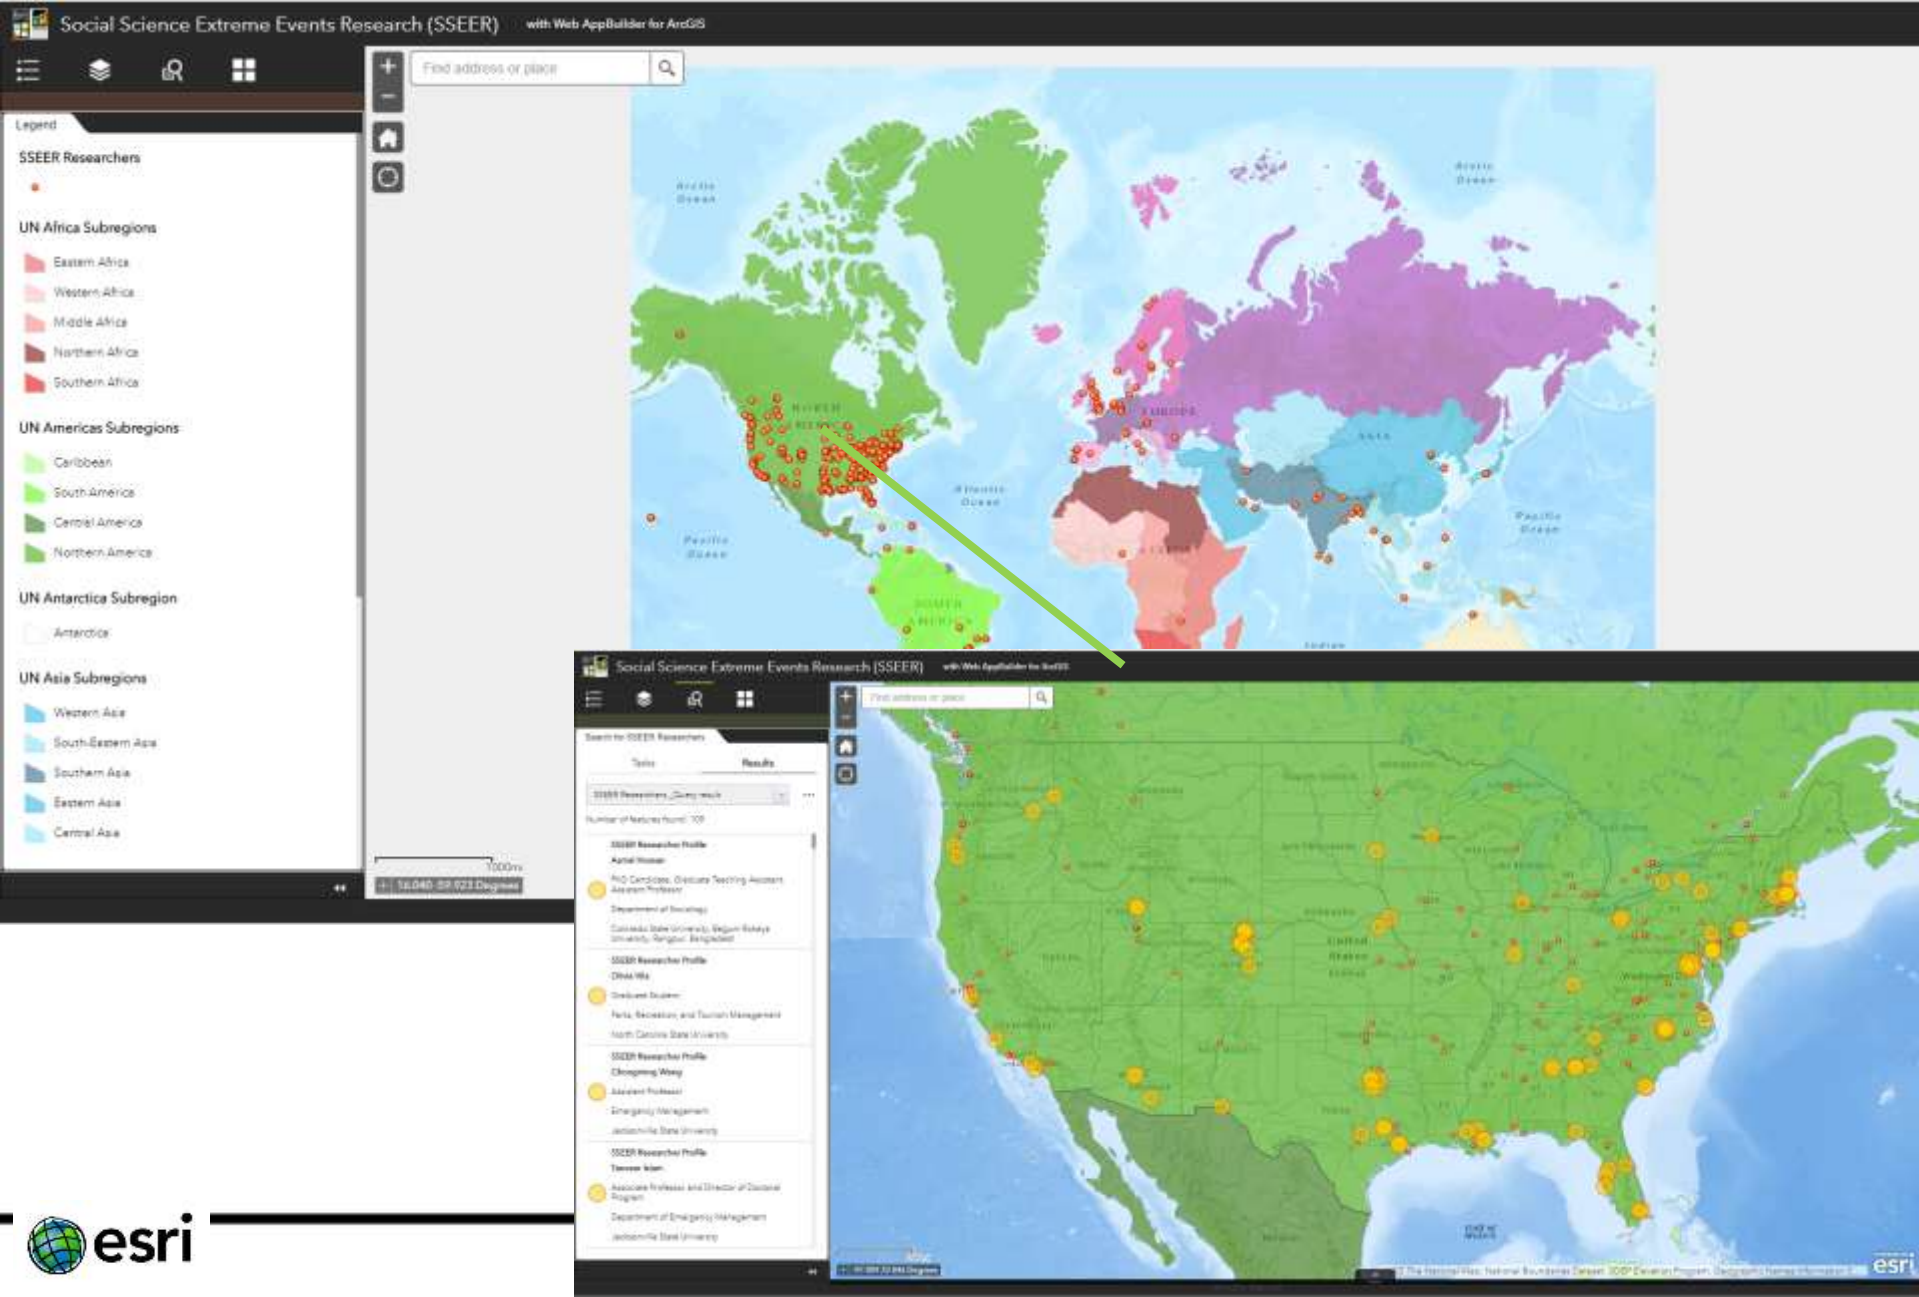

# SSEER Researchers by 7 UN Regions

# SSEER Researchers by 24 UN Subregions

# SSEER Researchers by Nation

- ✓ How many social science hazards and disaster researchers are there?
- ✓ Where are these researchers located?
- ✓ **What disciplines** do they represent and what is their **topical and methodological expertise**?

# The SSEER Census:

## Primary Social Science Discipline\*

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

# The SSEER Census:

## Primary Professional Status

- Academic Researcher
- Student
- Private-Sector Researcher
- Non-Profit Researcher
- Government Researcher
- Independent Researcher
- Other

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

# The SSEER Census – Demographic Information

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

# The SSEER Census – Demographic Information

## All researchers:

- Age range: 23 to 78 years-old
- Average age: 41.31 years-old
- Average of 10.1 years of research experience in hazards and disaster field

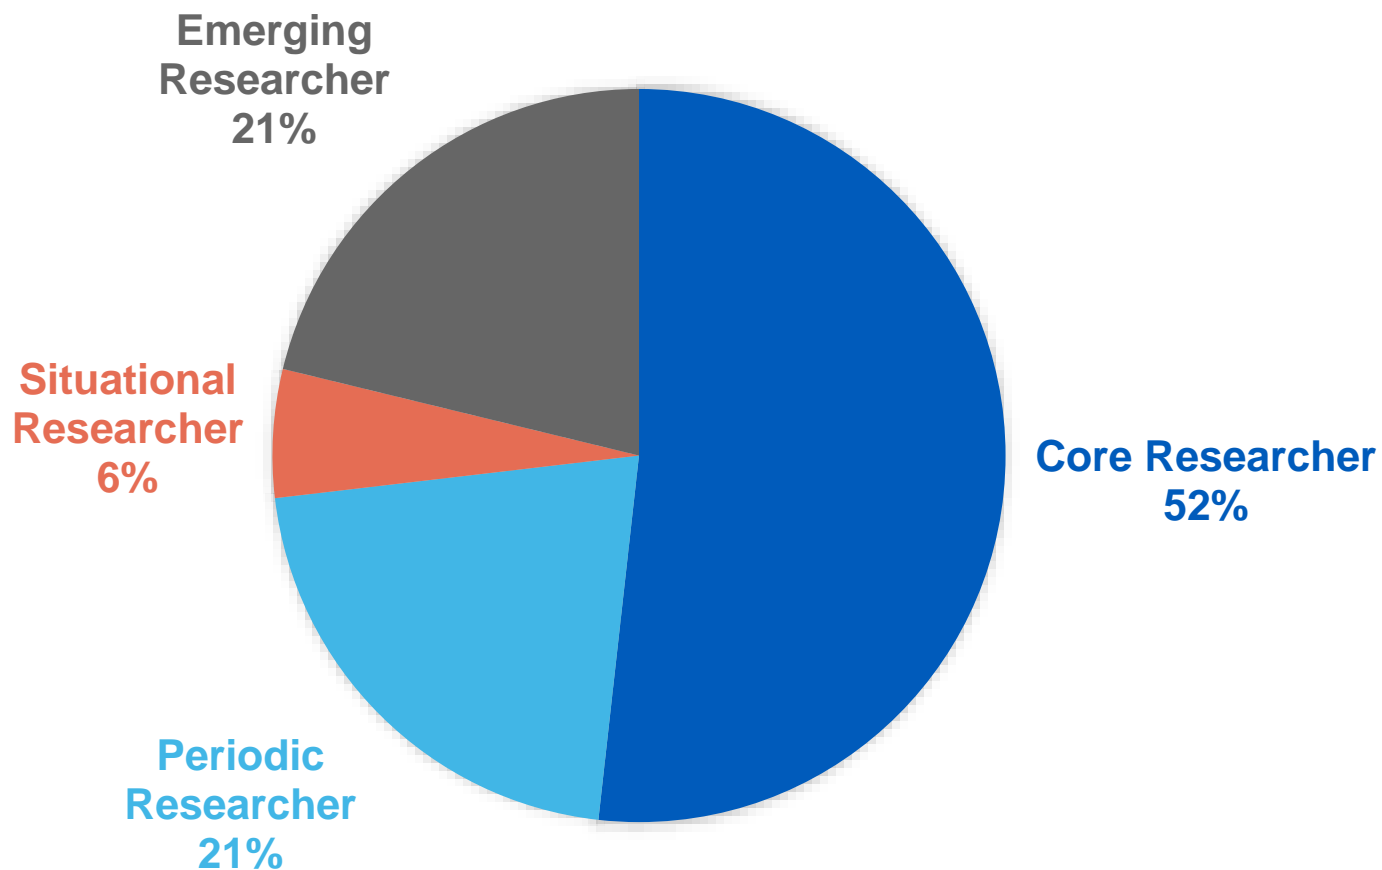

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

# The SSEER Census:

## Current Status as a Researcher

[hazards.colorado.edu/join-SSEER](https://hazards.colorado.edu/join-SSEER)

# Current and Future Visions

- ❑ Create a **novel, systematic database** and maps
- ❑ Work to **democratize the research and engagement process** before, during, and after disaster strikes
- ❑ Encourage more **effective cross-disciplinary collaborations** between researchers, practitioners, and policy makers
- ❑ Ensure that research is **holistic, rigorous, and ethically-grounded**
- ❑ Increase the **visibility** and **positive impact** of the social science hazards and disaster community by publicly *articulating who we are, what we know, and how we can use our knowledge and skills to reduce hazards and disaster losses*, especially among the most vulnerable people
- ❑ Advance a **social science hazards and disaster research agenda** grounded in concerns regarding **justice, equity, and risk reduction**

# Thank you!

**Lori Peek**

**NATURAL HAZARDS CENTER**

Welcome to the Hazard and Disaster Research Centers web map.

In an effort to increase collaboration and access to emerging research, the Natural Hazards Center has compiled information on more than 300 hazards and disaster research centers at academic institutions around the world. Below, you'll find a comprehensive list of centers doing work on a wide range of social science, public health, and engineering research.

The map highlights the centers by geographic location. Just click on the locators to view a pop-up menu with basic information about each center and a link to further resources. You might need to zoom in closely on areas containing multiple centers in close proximity. Use the wheel on your mouse or the touchpad on your laptop to zoom in and out. A list of centers arranged by country and state is also included beneath the map. Clicking on the name of a center in this list will take you to the center's website.

Please see the instructions (WHERE TO FIND THEM) for more information regarding how to use the widgets that will enable you to search for research centers and do other tasks within the

esri
